Wood Science and Technology

Journal of the International Academy of Wood Science

Editors:

H. Schulz, München

W. Liese, Hamburg

T. E. Timell, Syracuse

Editorial Board:

F. E. Dickinson, Richmond

W. E. Hillis, Melbourne

R. Kennedy, Vancouver

K. Kratzl, Wien

J. F. Levy, London

D. Noack, Hamburg

Associate Editor:

K. A. Sorg, München

Vol. 11 · 1977

Springer-Verlag New York Heidelberg Berlin

Contents

Originals

Adler, E.: Lignin chemistry–Past, present and future. 169

Babicki, R.; Grzeczyński, T.; Wróblewska, H.: Effect of hydro-thermal treatment of green beech wood on its chemical and physico-mechanical properties. 125

Barnett, J. R.: Tracheid differentiation in *Pinus radiata*. 83

Boyd, J. D.: Relationship between fibre morphology and shrinkage of wood. 3

Boyd, J. D.: Interpretation of X-ray difractograms of wood for assessments of microfibril angles in fibre cell walls. 93

Chafe, S. C.: Radial dislocations in the fibre wall of *Eucalyptus regnans* trees of high growth stress. 69

Ericsson, Th.; Petersson, G.; Samuelson, O.: Galacturonic acid groups in birch xylan. 219

Higuchi, T.; Shimada, M.; Nakatsubo, F.; Tanahashi, M.: Differences in biosyntheses of guaiacyl and syringyl lignins in woods. 153

Huang, H. I.; Sarkanen, K. V.; Johanson, L. N.: Diffusion of dissolved oxygen in liquid-saturated Douglas fir sapwood. 225

Johansson, M. H.; Samuelson, O.: Reducing end groups in birch xylan and their alkaline degradation. 251

Koran, Z.: Tangential pitting in black spruce tracheids. 115

Nissan, H. A.: The elastic modulus of lignin as related to moisture content. 147

Okumura, S.; Harada, H.; Saiki, H.: Thickness variation of the G-layer along a mature and a differentiating tension wood fiber in *Populus euramericana*. 23

Parameswaran, N.; Liese, W.: Occurrence of warts in Bamboo species. 313

Parham, R. A.; Robinson, K. W.; Isebrands, J. G.: Effects of tension wood on kraft paper from a short-rotation hardwood (*Populus "Tristis No. 2"*). 291

Polčin, J.; Bezúch, B.: Investigation on enzymic hydrolysis of lignified cellulosic materials. 275

Rypáček, V.: Chemical composition of hemicelluloses as a factor participating in the substrate specificity of wood-destroying fungi. 59

Stamm, A. J.: Monomolecular adsorption and crystallite diameters of cellulose from structural and adsorption considerations. 39

Stoll, M.; Fengel, D.: Studies on holocellulose and alpha-cellulose from spruce wood using cyro-ultramicrotomy. Part I: Structural changes of the fibre walls during delignification and alkali extraction. 265

Tantichaiboriboon, V.; Cook, R. D.: Studies on effect of shape of cut on growth-stress induced cracking in cut timber. Part I: Three dimensional stress analysis. 237

Tantichaiboriboon, V.; Cook, R. D.: Studies on effect of shape of cut on growth-stress induced cracking in cut timber. Part II: Optimization of axisymmetric cuts. 305

Tauchert, T. R.; Hsu, N. N.: Shrinkage stresses in wood logs considered as layered, cylindrically orthotropic materials. 51

Tsoumis, G.; Passialis, C.: Effect of growth rate and abnormal growth on wood substance and cell wall density. 33

Wegener, G.; Fengel, D.: Studies on milled wood lignins from spruce. Part I. Composition and molecular properties. 133

Letters to the Editor

Maloney, T. M.: Tenth Particleboard Symposium held at Washington State University: Composition board industry searching for solutions to problems. 79
Maloney, T. M.: Eleventh Particleboard Symposium held at Washington State University: Composition board industry searching for solutions to problems. 319

Book Reviews

Core, H. A., Côté, W. A., Day, A. C.: Wood structure and identification. 250
Frey-Wyssling, A.: The plant cell wall. 249

EUROPE: Now you can search ISI® data ON-LINE through ESA-SDS

You now can have immediate access via the ESA-SDS computer to 1,300 of the world's most important physics, chemistry and engineering journals—the same journals covered in the *Science Citation Index®*, *CC®/Physical & Chemical Sciences* and *CC/Engineering, Technology & Applied Sciences*.

Whether you're interested in—

- current awareness
- selective dissemination of information
- retrospective searching as far back as 1972

—the ESA-SDS computer will search the ISI data, find the information you want and deliver it *fast*.

All you need for this quick, on-line searching is a teletype or video-display terminal. You dial a number and are linked to the ESA-SDS central computer in Frascati, Italy.

ESA-SDS may be accessed by direct line with Frascati or by dialing through the PTT network to London, Brussels, Paris, Copenhagen, Darmstadt, or Rome. You can also dial via PTT lines to TYMESHARE in Brussels, Paris, Lausanne, London, or The Hague.

Find out more about how ISI data and ESA-SDS can make your literature searches faster, easier and more effective than ever before.

Mail the coupon below. Or contact David Raitt at the Space Documentation Service, ESA-SDS, Via Galilei, 00044 Frascati (Roma), Italy. Tel.: (Rome) 94 22 401; Telex: 61637 ESRINROM. Do it today.
